The Mandatory Evolution of ERP Software

THE BEST-KEPT SECRET YOUR ERP VENDOR DOESN'T WANT YOU TO KNOW

1990   **ERP**   2000

THE ADVENT OF ERP SOFTWARE in the 1990s represented a phenomenal breakthrough for business. Companies around the world began to run smarter, faster and more profitably.

WE ALL LOVE OUR ERP SOFTWARE

Oracle® or SAP® applications are at the heart of almost every Fortune 500 and Global 2000 company, including yours. In the beginning, your vendor delivered great software and valuable support that helped you troubleshoot issues and optimize your systems.

Time   **Resources**   **Money**

MANDATORY EVOLUTION

OVER TIME, THAT MODEL CHANGED

For many the support partnership with your vendor eroded and software improvements have all but disappeared.

THE ERP SUPPORT MODEL STIFLES BUSINESS TRANSFORMATION

Your IT team is expected to deliver innovation that redefines the status quo within your industry and build a competitive advantage for your business. Yet there are diminishing returns for your on-premise ERP software maintenance, now that both Oracle and SAP have shifted focus to cloud-based applications.

ERP CLIENTS FACE **?** A CROSSROADS

Over half of IT projects run
89%
over budget

65%
of issues are not supported by the vendor

89%
of IT budgets is spent on ongoing operations
