## The Business Challenge

While Oracle EBS releases are still meeting business needs, customers are frustrated with forced software upgrades and high maintenance fees. Licensees realize little value from Oracle support, and customizations are not supported. Their annual contracts are essentially funding next-generation Oracle Cloud systems that they may or may not adopt. Those who want to keep their stable EBS release intact and assess cloud options in their own time are considering the business case for independent support.

### Solution

Rimini Street independent support for Oracle E-Business Suite goes well beyond providing standard break/fix assistance. Each client receives personalized service from a senior-level Primary Support Engineer (PSE). Clients have direct access to an expert with their first call. PSEs are available 24/7/365, anywhere in the world, with an average response time of less than five minutes for critical issues. Clients benefit from software fixes and updates, support for customized code, and a team of experts who focus on interoperability challenges, roadmap planning, and proactive security.

## **Solution Overview**

Rimini Street independent, third-party support for Oracle E-Business Suite (EBS) delivers significant costs savings over Oracle support plus premium service, a guaranteed 10-minute response SLA for critical P1 issues, and upgrade flexibility. With a seasoned team of experts, Rimini Street provides world-class support for Oracle® EBS 11i, R12 and earlier releases. Clients achieve up to 90% savings on total maintenance costs and can craft a Business-Driven IT roadmap aligned with business priorities rather than follow a software vendor-dictated roadmap.

Gain the benefits and value of a single-source support provider. In addition to Oracle EBS, Rimini Street supports Oracle Database, Oracle Fusion Middleware, Oracle Retail, Siebel, PeopleSoft, JD Edwards, Hyperion, and Agile Product Lifecycle Management.
