

Rimini Connect™ Console

RIMINI CONNECT SOLUTIONS

- › Rimini Connect™ for Browsers
- › Rimini Connect™ Console
- › Rimini Connect™ for OS
- › Rimini Connect™ for Java
- › Rimini Connect™ for Email

KEY BENEFITS

- › Significant savings from delayed enterprise software upgrades
- › Modernize IT by implementing the latest releases of browsers and functionality
- › Focus your IT budget on projects that deliver real value to your business.

Rimini Connect™ Solutions

The Rimini Connect™ portfolio keeps existing enterprise software running in a world of ever-changing technology.

Rimini Connect Console is a single-pane-of-glass management tool that unifies and simplifies the administration, configuration and monitoring of Rimini Connect™ for Browsers, and will support additional Rimini Connect solutions in the future.

Rimini Connect solutions have been proven over time. Rimini Street has successfully resolved thousands of compatibility issues on behalf of our clients since we were founded in 2005. Rimini Connect is built on those experiences and provides a suite of seamless interoperability solutions that eliminate compatibility surprises. Additionally, Rimini Connect interoperability solutions are fully supported by Rimini Street giving you peace of mind that our experienced team is there to support you.

Business Lifecycle Risks and Solutions

Many organizations depend on established enterprise software to run their essential business functions. These applications are typically reliable and tailored to their needs, have been in use for many years, and are only updated every five to ten years on average.¹

As technology stacks advance to offer new or improved features, compatibility with enterprise software often becomes challenging. Updates to technology stacks are now a common occurrence. For example, Windows² clients receive updates at least once a month, while Chrome browsers³ receive full updates approximately every six weeks. When combined with enterprise software that is infrequently updated (averaging 5-10 years)⁴, this creates a complex interdependent and ever-expanding compatibility matrix.

Traditional Compatibility Approaches are Reactive

Traditionally, enterprise software vendors require patches or upgrades to new software versions whenever there are changes to a browser that impacts functionality. In today's environment, upgrading enterprise software has become expensive, requires substantial downtime for installation and testing, and can significantly disrupt business productivity.

³ Google Support: [Manage Chrome Updates \(Chrome Enterprise Core\)](#)

⁴ ERP SoftwareBlog: [How Often Should You Upgrade Your ERP Software?](#)

FREQUENT UPDATES CAN LEAD TO COSTLY BUSINESS ISSUES:

- › Business disruption caused by compatibility issues with existing enterprise software
- › Inability to capitalize on new browser technologies due to enterprise software compatibility
- › Expense and operational impact required by enterprise software upgrades to maintain compatibility

Rimini Connect™ Console

A single-pane-of-glass management tool unifying and simplifying administration and monitoring of Rimini Connect.

Immediately available for Rimini Connect for Browsers and for additional Rimini Connect solutions in the future, Rimini Connect Console is the latest advancement in Rimini Street's interoperability solutions suite which are designed to extend the useful life of existing systems by insulating applications from changes in dynamic technology stacks and compatibility standards that may otherwise result in costly upgrades or custom development.

Rimini Connect Console unifies and automates several important capabilities into one centralized management tool, including:

REAL-TIME VIEW OF ARCHITECTURE

An enterprise-wide single-pane-of-glass view of your full deployment of Rimini Connect services and related system resources

SIMPLIFIED MONITORING FROM ONE DASHBOARD

Monitor the status of your entire Rimini Connect for Browsers infrastructure from one dashboard and start, stop, or configure services as needed

IN-DEPTH ANALYSIS

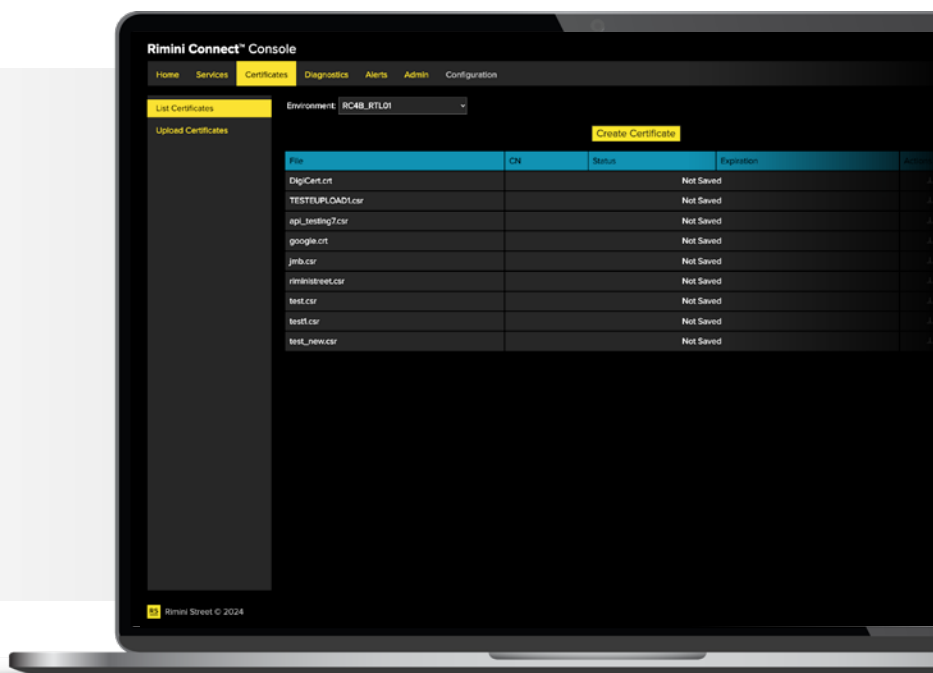

In-depth analysis logs and alerts from all servers and services in your Rimini Connect ecosystem uncovers system-wide issues

STREAMLINE ROUTINE TASKS

Includes the ability to centralize management of digital certificates and automate updating and installation of new certificates across your Rimini Connect ecosystem

Rimini Connect Console helps clients avoid the risk of business disruption with a fully supported, proven interoperability solutions bringing you peace of mind.

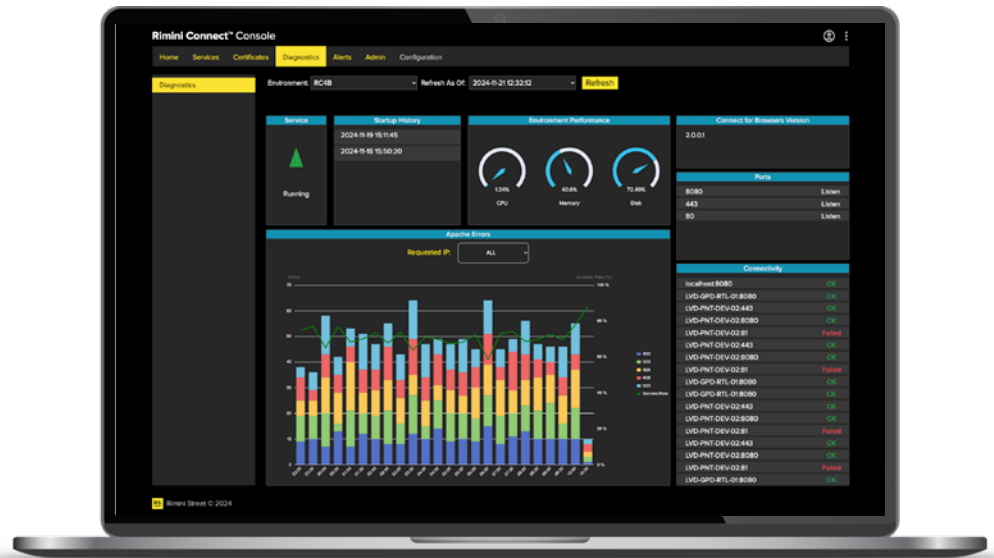

If you have a new browser update, you don't want to buy a new ERP system because Google put out a new version of Chrome. You want all of these things to be available as options. And that's what we do with our Connect products.

Rimini Street

Plan For Your Business Needs

Rimini Connect expands options for your technology roadmaps. Our interoperability specialists offer technology roadmap consultations to map upcoming changes in technology stacks and enterprise software. This helps organizations take control of when and where to invest their resources to innovate around the edges and invest in products that have the greatest impact on the business.

Make Interoperability Issues a Thing of the Past

The Rimini Connect platform helps clients avoid risk of business disruption with proven interoperability solutions bringing you peace of mind. We make it possible to decouple your existing enterprise software from your technology stack, proactively managing each roadmap independently. Our platform gives you the agility to extend the life of your enterprise software and gain a competitive advantage by avoiding rushed, unnecessary, and costly ERP upgrades. The Rimini Connect solution enables allocation of budget and resources for projects that truly benefit your business.
