

# Rimini Connect™ for Email

## KEY BENEFITS

- › Avoid cost, disruption, and risk of core enterprise software upgrades
- › Extend application lifespans avoiding imposed upgrades
- › Reserve precious IT resources for mission-critical projects
- › Peace of mind that your email platform is leveraging the latest security with flexibility for future updates

The Rimini Connect portfolio is designed to keep existing enterprise software running in a world of ever-changing technology. Rimini Connect for Email enables organizations to upgrade their email servers and infrastructure while ensuring seamless backward compatibility with existing enterprise software, including Oracle and SAP.

Rimini Connect solutions have been proven over time. Rimini Street has successfully resolved thousands of compatibility issues on behalf of our clients since we were founded in 2005. Rimini Connect is built on those experiences and provides a suite of seamless interoperability solutions that eliminate compatibility surprises. Additionally, Rimini Connect interoperability solutions are fully supported by Rimini Street giving you peace of mind that our experienced team is there to support you.

## Business Lifecycle Risks and Solutions

Many enterprise applications and databases integrate email into workflows to enhance efficiency and response times for approvals. If your workflow fails due to updates in your email solution (e.g. Microsoft Outlook), productivity may be hindered or come to a complete stop.

Authentication protocols for email have and will continue to evolve. Microsoft Exchange Online requires a newer version of authentication known as OAuth 2.0 as of December 31, 2022.<sup>1</sup> Standards groups are working on the next version of authentication known as OAuth 2.1,<sup>2</sup> and members of that group are already debating the merits of this and future protocols.<sup>3</sup>

Rimini Connect for Email is a proven solution designed to maintain the smooth operation of existing enterprise software workflows, regardless of your email solution or the protocol it supports.

## Traditional Compatibility Approaches are Reactive

Traditionally, enterprise software vendors release patches or create new software versions whenever there are changes to an operating system that impacts functionality. In today's environment, upgrading enterprise software has become expensive, requires substantial downtime for installation and testing, and can significantly disrupt business productivity.

<sup>1</sup> Microsoft: [Deprecation of Basic authentication in Exchange Online](#)

<sup>2</sup> OAuth2.1: <https://oauth.net/2.1/>

<sup>3</sup> Aaron Parecki: [It's Time for OAuth 2.1](#)

## ADDITIONAL BENEFITS

- › Existing enterprise software interacts seamlessly with your preferred email solution
- › Avoid costly enterprise software upgrades including downtime and business disruption
- › Rimini Connect is backed by our experienced team resolving thousands of compatibility issues for clients since 2005

*Clients are amazed at what's possible because they are usually only aware of options provided by vendors. Our solutions really help clients take control of their technology roadmap.*

### Desmond Whitt

VP & General Manager of Rimini Connect at Rimini Street

## Run Existing Software With Modern Email Solutions

Rimini Connect for Email is a seamless solution that builds an abstraction layer between existing enterprise applications and your preferred email solution. We can enable current and future email protocols with existing enterprise software so that you can focus on innovative projects that drive real value for your business.

Security is critical for your business. The Rimini Street Connect server is client hosted which means it resides within your environment behind other layers of security including your firewall. This allows you to benefit from the additional protection that current and future protocols offer when authenticating across the open internet.

## Plan For Your Business Needs

Rimini Connect expands options for your technology roadmaps. Our interoperability specialists offer technology roadmap consultations to map upcoming changes in technology stacks and enterprise software. When combined with Rimini Connect interoperability solutions, organizations can choose to invest their resources upgrading the components that have the greatest impact on the business.

## Make Interoperability Issues a Thing of the Past

The Rimini Connect platform helps clients avoid risk of business disruption with proven interoperability solutions bringing you peace of mind. We make it possible to decouple your existing enterprise software from your technology stack, proactively managing each roadmap independently. Our platform gives you the agility to extend the life of your enterprise software and gain a competitive advantage by avoiding rushed, unnecessary, and costly ERP upgrades. The Rimini Connect solution enables allocation of budget and resources for projects that truly benefit your business.
